

EXCELLENCE

PrismSix Technologies is a premier consulting and engineering services firm servicing both government and commercial customers. Our

company is dedicated to a simple principle: our clients and our employees always come first.

We operate across a diverse range of specializations including software development, cyber security, information assurance, cloud computing, mobile applications, project management, and unified communications solution delivery. We employ top talent that has helped to secure some of the most mission critical communications on the globe, create innovative solutions for the large telecommunications service providers, and deploy cost reducing solutions for tax payers and commercial companies alike.

We look forward to delivering a high-quality solution, the PrismSix way, for your enterprise today.

INNOVATION

CONSULTING SERVICES

Software Development

We pride ourselves on delivering high-quality software products for our clients mission critical needs.

Unified Communications

Our experts have more than a decade of experience designing proven voice and video over IP solutions for some of the largest commercial and government telecommunications providers in the world.

Systems Engineering

Flexible, robust, and scalable systems design. It's what we do best and our experts have the track record to prove it.

Cyber Security

Whether designing public key infrastructure based applications, incorporating two-factor single sign-on technologies, or securing data-at-rest in the cloud, our experts have the experience to secure your mission critical data information.

Project Management

We employ Project Management Professional (PMP) certified project managers that understand the importance of delivering on time, under budget, and on target quality.

IMAGINATION

OUR VALUES

Integrity

At all times, we deal honestly and truthfully with our clients.

Continuous Improvement

We execute continual process improvement procedures to ensure that the job is not only done right, but areas of improvement are identified to accelerate performance and efficiency for our customers.

Creativity

A bottom-to-top culture of innovation is the engine that drives PrismSix Technologies' best-in-class solution delivery.

Performance

Tight deadlines? Aggressive schedule? No problem. We stand ready to deliver.

People

We value our employees and strive to reward their hard work while promoting personal career growth and a healthy work-life balance.
